

# PRIXMAX EURO ULTRA

ENGINE COOLANT ENGINEERED  
FOR MODERN EUROPEAN VEHICLES.

Formulated with a high performance inhibitor package combining silicate additives with a robust backbone of Organic Additive Technology inhibitors (Si-OAT), PrixMax Euro Ultra has been engineered to suit the latest high-tech engines where high temperature aluminium protection is critical.

That's why PrixMax Euro Ultra has gained factory approval from the Volkswagen Group against their latest coolant specification VW TL 774 J.

Having successfully passed stringent VW lab, performance and fleet tests, PrixMax Euro Ultra can be used with confidence in modern European vehicles requiring the latest Si-OAT inhibitor technology for maximum corrosion, cavitation and erosion protection.
